General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

JANUARY 1979

Issued April 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Note: In keeping with the Multi-Fiber Agreement, and effective with U.S. statistics for January 1979, the information in this report has been expanded to include information on wool fibers and man-made fiber manufactures. The title of this report has, therefore, been changed from "General Imports of Cotton Manufactures" to "Cotton, Wool, and Man-Made Fiber Manufactures."

Cotton, Wool, and Man-Made Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

Looking for statistical sources? Check the Bureau of the Census GUIDE TO PROGRAMS AND PUBLICATIONS Subjects and Areas, 1973

Find out about Bureau of the Census programs fast. The Guide lists not only the censuses but also current surveys that update them. The descriptions and definitions are all there so that **YOU CAN GET THE ANSWERS.**

This updated and expanded Guide covers programs and reports from January 1968 to January 1973 on:

AGRICULTURE
CONSTRUCTION
ECONOMIC STATISTICS...
Employment Changes
Exports, Imports, and Output
County Business Patterns
GEOGRAPHIC REPORTS AND MAPS
GOVERNMENTS
HOUSING
MANUFACTURING
MINERAL INDUSTRIES
POPULATION
RETAIL TRADE

SERVICES
TRANSPORTATION
WHOLESALE TRADE

as well as

STATISTICAL ABSTRACTS AND GUIDES
COUNTY AND CITY DATA
CONGRESSIONAL DISTRICT DATA
HISTORICAL TRENDS

Have information fast. Order your copy of the Bureau of the Census **GUIDE TO PROGRAMS AND PUBLICATIONS Subjects and Areas, 1973.**

228 pp. at \$2.45

FEBRUARY 1979

Issued April 1979

FT-130-79-2

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information is to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Note: In keeping with the Multi-Fiber Agreement, and effective with U.S. statistics for January 1979, the information in this report has been expanded to include information on wool fibers and man-made fiber manufactures. The title of this report has, therefore, been changed from "General Imports of Cotton Manufactures" to "Cotton, Wool, and Man-Made Fiber Manufactures."

Cotton, Wool, and Man-Made Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

MARCH 1979

Issued June 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 41 commodity categories of cotton.)

COUNTY AND CITY DATA BOOK 1977

An indispensable reference tool presenting selected social and economic statistics for States, metropolitan areas, counties, and cities. Covers a wide variety of topics, including population, housing, employment, vital statistics, crime, retail and wholesale trade, poverty, education, health, social security, local government finances and employment, and many more.

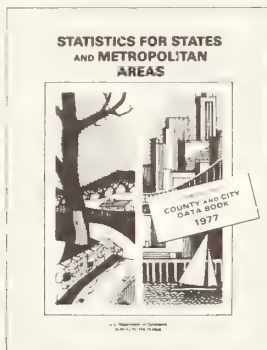

An updating of many of the statistics in **County and City Data Book, 1972**.

CONTENTS INCLUDE:

- 195 items of statistical data for the 50 States and 3,143 counties (or county equivalents)
- 161 items for each of 277 standard metropolitan statistical areas (SMSA's)
- 190 items for each of the 910 cities of 25,000 inhabitants or more
- descriptive text, explanatory notes, and source citations
- maps, charts, and appendices

Clothbound
1,011 pp.
at \$19.50

ALSO AVAILABLE: **Statistics for States and Metropolitan Areas**, a preprint of the tables for census regions and divisions, States, and standard metropolitan statistical areas from the **Data Book**. Includes explanatory notes. 110 pp., \$2.75

STILL AVAILABLE: **County and City Data Book, 1972**, clothbound, 1,076 pp., \$18.65

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

APRIL 1979

Issued June 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of importation, inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials. Entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practical extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule of Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

COUNTY BUSINESS PATTERNS 1977

Now Available

**1977 Data on Employment,
Payrolls, & Establishments**

County Business Patterns presents intercensal data on employment, number and employment size of establishments, and payrolls by 2-, 3-, and 4-digit levels of the Standard Industrial Classification (SIC) for States and counties. This annual series includes a separate paperbound report for the United States, each State, and the District of Columbia.

The individual State reports present for the State, number of establishments, employment, and payroll data by employment-size class to the 4-digit SIC level. Also included, by major industry group, are data on the number of establishments with 1,000 or more employees, by employment-size class.

The U.S. Summary includes data by detailed industry (4-digit SIC) level for the United States and by major group (2-digit SIC) for each State. For the U.S., number of establishments, employment, and payroll data are also provided by employment-size class to the 4-digit SIC level. Also included, by major industry group, are data on the number of

establishments, employees, and payroll of administrative and auxiliary establishments.

The Standard Metropolitan Statistical Area (SMSA) includes the same data items as the State reports by major group (2-digit SIC) for each SMSA. For the New England States, data are published by the New England County Metropolitan Area (NECMA).

CBP is a standard reference source of small-area data for business persons, market researchers, and industrial and civic planners.

CBP data are especially useful for:

- Analyzing market potentials
- Determining location and size of sales territories
- Establishing sales quotas and advertising budgets
- Locating production, marketing, and service facilities.

CBP data are shown in detail for the following broad industry categories: Agricultural services, forestry, and fisheries

- Mining
- Contract construction
- Manufacturing
- Transportation and other public utilities
- Wholesale Trade
- Retail trade
- Finance, insurance, and real estate
- Services

Data in Other Formats

Published CBP data, by county and by industry, will be available at cost, on computer tapes. Inquiries should be addressed to Chief, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

The reports described in this announcement are also available on microfiche. For further information, contact: Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233

For a descriptive order form, listing all available titles and prices, fill in the request below, and mail to the address shown.

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

MAY 1979

Issued July 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

JUNE 1979

Issued August 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures.)

FT 130-79-7

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

JULY 1979

Issued September 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

AUGUST 1979

Issued October 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

CURRENT CONSTRUCTION REPORTS

CONSTRUCTION accounts for approximately 12 percent of the gross national product!

To assist industry representatives, research specialists, market analysts, and government officials interested in this vital segment of the Nation's economy, the Bureau of the Census issues **monthly, quarterly, and annual** reports on the value of new construction put in place, building permits, housing starts, housing completions, housing sales, alterations and repairs and demolition of residential structures.

Current Construction Reports include:

C20 - Housing Starts

C21 - New Residential Construction in Selected Standard Metropolitan Statistical Areas

C22 - Housing Completions

C25 - Sales of New One-Family Houses

C27 - Price Index of New One-Family Houses Sold

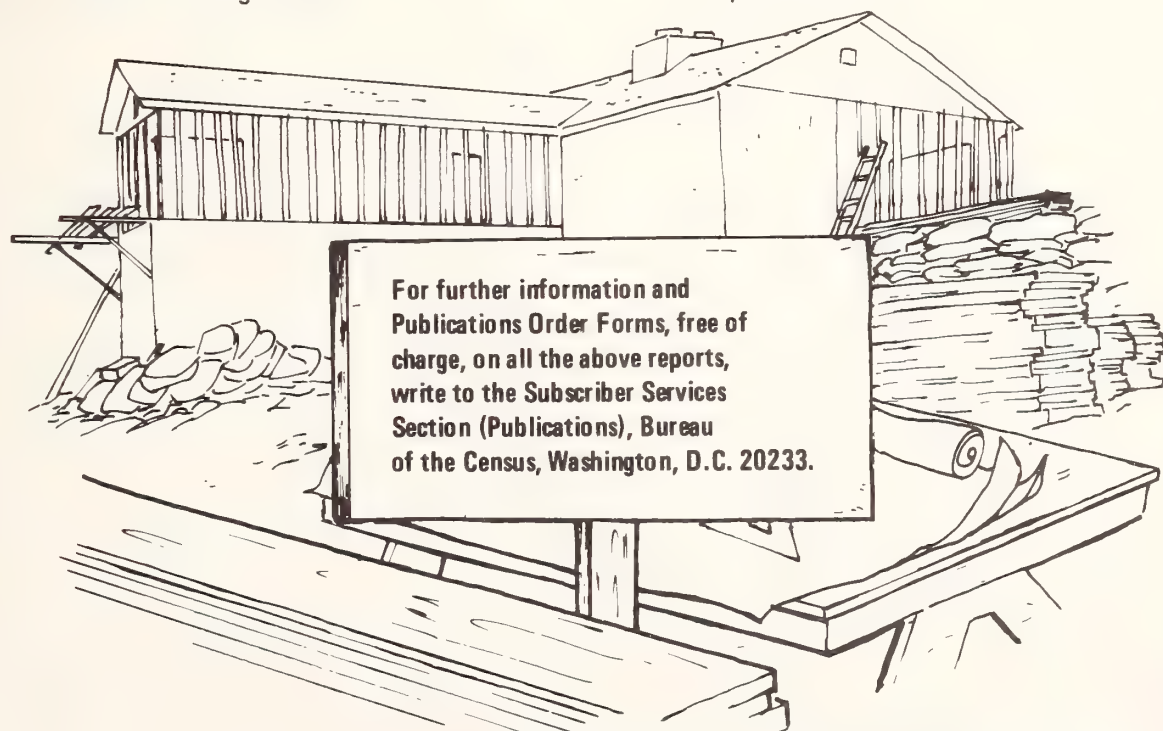

C30 - Value of New Construction Put in Place

C40 - Housing Authorized by Building Permits and Public Contracts

C41 - Authorized Construction—Washington, D.C. Area

C45 - Permits Issued for Demolition of Residential Structures in Selected Cities

C50 - Expenditures on Residential Additions, Alterations, Maintenance and Repairs, and Replacements

For further information and Publications Order Forms, free of charge, on all the above reports, write to the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233.

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

SEPTEMBER 1979

Issued November 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

**Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin,
by Agreement Category**

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

Agreement category	Country of origin and agreement category description	Unit of quantity	Net quantity		Agreement category	Country of origin and agreement category description	Unit of quantity	Net quantity

1978 edition Schedule B

Statistical Classification of Domestic and Foreign Commodities Exported from the United States

*the Bureau of the Census
offers*

The new edition of Schedule B, **Statistical Classification of Domestic and Foreign Commodities Exported from the United States**. Shown in this 1978 edition are current Schedule B commodity classification code numbers required on Shippers' Export Declarations.

The 1978 edition of Schedule B has been prepared through the efforts of the various government agencies involved and with the cooperation and assistance of industry, trade associations, exporters, and freight forwarders.

The structure of the new edition follows the format of the Tariff Schedules of the United States (the import schedule) and will result in changes to the codes used to identify commodities exported.

The new Schedule B publication is priced at \$13.00, including subsequent revisions. Copies may be ordered from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

General Imports of Cotton, Wool, and Man-Made Fiber Manufactures

OCTOBER 1979

Issued December 1979

Country of Origin and Cotton, Wool, and Man-Made Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and man-made fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of man-made fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Man-Made Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and man-made fiber manufactures)

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

NOVEMBER 1979

Issued January 1980

FT 130-79-11

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

DECEMBER 1979

Issued February 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

Bureau of the Census catalog of publications 1790-1972

A Guide To The Growth Of The Nation!

A unique volume which provides a comprehensive historical bibliography of sources for Bureau of the Census statistics from 1790 through 1972.

BUREAU OF THE CENSUS CATALOG OF PUBLICATIONS

1790 - 1972

TWO CATALOGS UNDER ONE COVER

This useful consolidated Catalog is presented in two sections. The first section, a reprint of the **Catalog of United States Census Publications, 1790-1945**, presents a compilation of all materials issued by the Bureau of the Census and its preceding organizations starting with the first decennial report of 1790. The second section, **Bureau of the Census Catalog of Publications, 1946-1972**, is a recent research document that updates and complements its historical predecessor.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JANUARY 1980

Issued March 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 10th commodity categories of cotton, wool, and manmade fiber manufactures)

U.S. BUREAU OF THE CENSUS- FACTFINDER for the Nation

FACTFINDER FOR THE NATION

A series of brochures geared to the general reader as well as the potential user of Census Bureau data. Published periodically, most *Factfinders* cover particular aspects of the Bureau's work, while others (Nos. 4 and 18) provide overall views and No. 5 offers a comprehensive bibliography.

Each brochure has 4 pages, except Nos. 4 and 5, which have 12 pages.

Series subscription, Nos. CFF 1-20, \$4.00. Individual copies, \$0.25 each, except No. 4 (\$0.30). Discount of 25 percent on orders of 100 copies or more sent to one address.

CURRENT INDUSTRIAL REPORTS

Keep up-to-date with Bureau of the Census data covering over 5,000 products representing 40% of all manufacturing in the United States!

The Bureau of the Census issues a continuing series of more than 100 monthly, quarterly, and annual reports on industrial production...inventories...and orders. Broad categories listed in the Current Industrial Series include:

All Manufacturing Industries

Manufacturers' Shipments, Inventories, and Orders

Manufacturers' Export Sales and Orders

Shipments of Defense-Oriented Industries

Processed Foods

Textile Mill Products

Apparel and Leather

Lumber, Furniture, and Paper Products

Chemicals, Rubber, and Plastics

Stone, Clay, and Glass Products

Primary Metals

Intermediate Metal Products

Machinery and Equipment

For further information on all reports included in these categories, frequency of reports, subscription prices, and a publications order form, free of charge, write to the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

FEBRUARY 1980

Issued April 1980

FT130-80-2

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

MARCH 1980

Issued May 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

U.S. BUREAU OF THE CENSUS- FACTFINDER for the Nation

FACTFINDER FOR THE NATION

A series of brochures geared to the general reader as well as the potential user of Census Bureau data. Published periodically, most *Factfinders* cover particular aspects of the Bureau's work, while others (Nos. 4 and 18) provide overall views and No. 5 offers a comprehensive bibliography.

Each brochure has 4 pages, except Nos. 4 and 5, which have 12 pages.

Series subscription, Nos. CFF 1-20, \$4.00. Individual copies, \$0.25 each, except No. 4 (\$0.30). Discount of 25 percent on orders of 100 copies or more sent to one address.

CURRENT INDUSTRIAL REPORTS

Keep up-to-date with Bureau of the Census data covering over 5,000 products representing 40% of all manufacturing in the United States!

The Bureau of the Census issues a continuing series of more than 100 monthly, quarterly, and annual reports on industrial production...inventories... and orders. Broad categories listed in the Current Industrial Series include:

All Manufacturing Industries

Manufacturers' Shipments, Inventories, and Orders

Manufacturers' Export Sales and Orders

Shipments of Defense-Oriented Industries

Processed Foods

Textile Mill Products

Apparel and Leather

Lumber, Furniture, and Paper Products

Chemicals, Rubber, and Plastics

Stone, Clay, and Glass Products

Primary Metals

Intermediate Metal Products

Machinery and Equipment

For further information on all reports included in these categories, frequency of reports, subscription prices, and a publications order form, free of charge, write to the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

APRIL 1980

Issued June 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

U.S. BUREAU OF THE CENSUS-

FACTFINDER for the Nation

FACTFINDER FOR THE NATION

A series of brochures geared to the general reader as well as the potential user of Census Bureau data. Published periodically, most *Factfinders* cover particular aspects of the Bureau's work, while others (Nos. 4 and 18) provide overall views and No. 5 offers a comprehensive bibliography.

Each brochure has 4 pages, except Nos. 4 and 5, which have 12 pages.

Series subscription, Nos. CFF 1-20, \$4.00. Individual copies, \$0.25 each, except No. 4 (\$0.30). Discount of 25 percent on orders of 100 copies or more sent to one address.

CFF No.	Title	Issued
1	Minority Statistics	June 1979
2	Availability of Census Records About Individuals	Apr. 1979
3	Agriculture Statistics	Jan. 1980
4	History and Organization	May 1979
5	Reference Sources	Dec. 1979
6	Housing Statistics	Sept. 1978
7	Population Statistics	Oct. 1977
8	Geographic Tools	Feb. 1978
9	Construction Statistics	Nov. 1978
10	Retail Trade Statistics	Dec. 1979
11	Wholesale Trade Statistics	Dec. 1979
12	Statistics on Service Industries	Dec. 1979
13	Transportation Statistics	Dec. 1979
14	Foreign Trade Statistics	Mar. 1978
15	Statistics on Manufactures	Jan. 1980
16	Statistics on Mineral Industries	Oct. 1979
17	Statistics on Governments	Nov. 1978
18	Census Bureau Programs and Products	Jan. 1979
19	Enterprise Statistics	Dec. 1979
20	Energy and Conservation Statistics	Jan. 1980

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

MAY 1980

Issued July 1980

FT130-80-5

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

1970 CENSUS OF POPULATION AND HOUSING

MICROFICHE Final Reports

Subjects covered include:

General Housing Characteristics
Block Statistics
Detailed Housing Characteristics
Metropolitan Housing Characteristics
Summary Housing Characteristics
Population of SMSA's
Occupied Rural Housing Units and Rural Population
Residential Finance
Components of Inventory Change
Real Estate Tax Data for Homeowner Properties
Number of Inhabitants
General Demographic Trends for Metropolitan Areas
Earnings by Occupation and Education
General Population Characteristics
Distribution of the Negro Population
General Social and Economic Characteristics
Census Tracts
Population of Voting Age for States
Marital Status
Data Collection Forms and Procedures
Geographic Identification Code Scheme

MICROFICHE are currently available for all final reports from 1968 to date. This compact format permits storage of more than 1,000 average length documents in an ordinary file drawer. Federal agencies now use a standard size microfiche 4" x 6" (105mm x 148mm). Census Bureau microfiche are 24X reduction, negative, diazo, with eye-readable headers except where otherwise indicated. Census data on MICROFICHE are normally more economical than paper copy and you reproduce only the data that you need.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JUNE 1980

Issued August 1980

FT130-80-6

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

**Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin,
by Agreement Category**

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

Agreement category	Country of origin and agreement category description	Unit of quantity	Net quantity		Agreement category	Country of origin and agreement category description	Unit of quantity	Net quantity

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JULY 1980

Issued September 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Bureau of the Census
Library

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

**Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin,
by Agreement Category**

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

CURRENT CONSTRUCTION REPORTS

CONSTRUCTION accounts for approximately **11 percent** of the gross national product!

To assist industry representatives, research specialists, market analysts, and government officials interested in this vital segment of the Nation's economy, the Bureau of the Census issues **monthly, quarterly, and annual** reports on the value of new construction put in place, building permits, housing starts, housing completions, housing sales, alterations and repairs and demolition of residential structures.

Current Construction Reports include:

C20 - Housing Starts

C21 - New Residential Construction in Selected Standard Metropolitan Statistical Areas

C22 - Housing Completions

C25 - New One-Family Houses Sold and for Sale

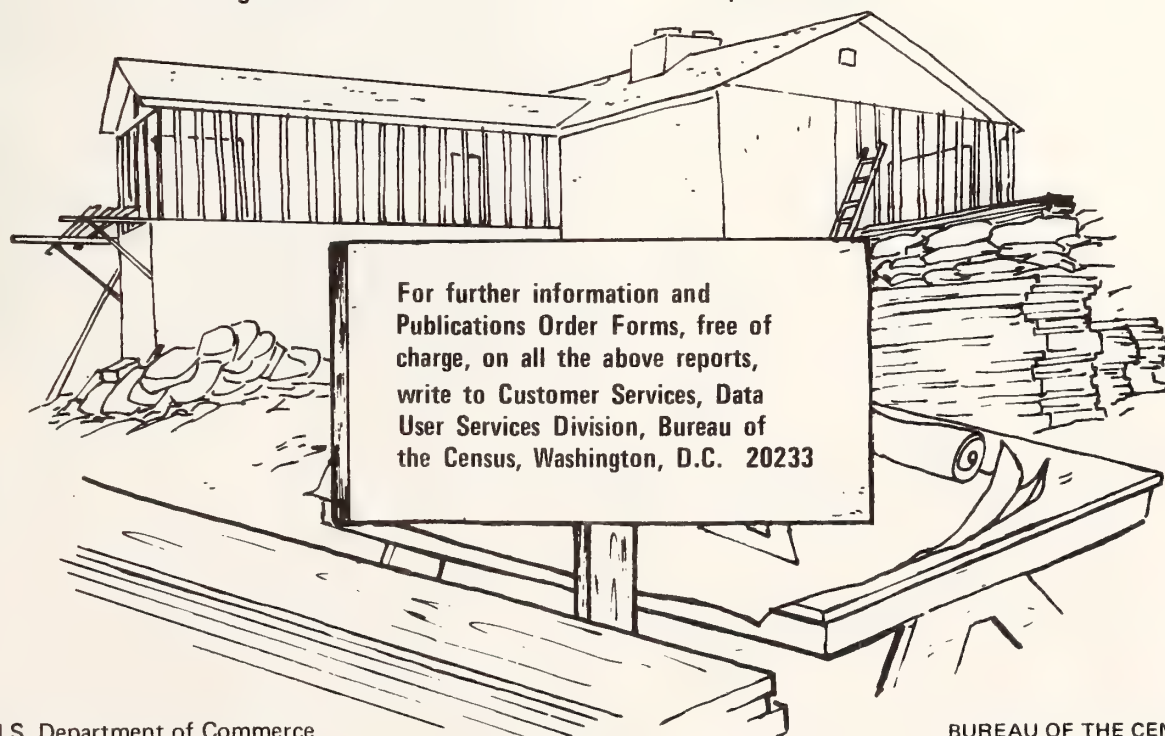

C27 - Price Index of New One-Family Houses Sold

C30 - Value of New Construction Put in Place

C40 - Housing Authorized by Building Permits and Public Contracts

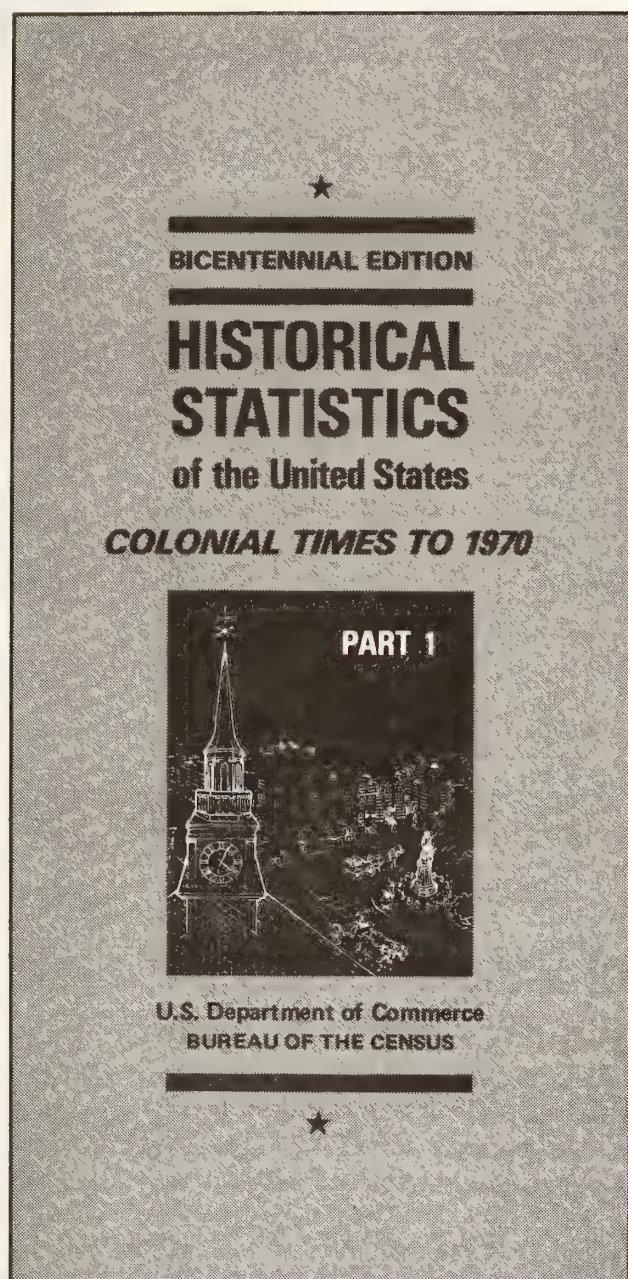

C45 - Permits Issued for Demolition of Residential Structures in Selected Cities

C50 - Expenditures on Residential Additions, Alterations, Maintenance and Repairs, and Replacements

For further information and Publications Order Forms, free of charge, on all the above reports, write to Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233

ANNOUNCING a Bicentennial edition of the basic reference book

DATA

More than 12,500 time series, mostly annual, on American social, economic, political, and geographic development covering periods from 1610 to 1970.

TEXT

References to other sources, description of development and reliability of the data, and definitions of terms.

SOURCE NOTES

Precise references to original sources for further study and additional information.

INDEXES

Time period index and detailed alphabetical subject index.

\$26.00 (cloth)

A total of 1,298 pages,
issued as Part 1 and Part 2.

Copies may be purchased from the Superintendent of Documents, Government Printing Office, Washington D.C. 20402, or from U.S. Department of Commerce District Offices or GPO Bookstores located in major cities.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

AUGUST 1980

Issued October 1980

FT130-80-8

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-1, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-1 are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

CURRENT CONSTRUCTION REPORTS

CONSTRUCTION accounts for approximately 11 percent of the gross national product!

To assist industry representatives, research specialists, market analysts, and government officials interested in this vital segment of the Nation's economy, the Bureau of the Census issues **monthly, quarterly, and annual** reports on the value of new construction put in place, building permits, housing starts, housing completions, housing sales, alterations and repairs and demolition of residential structures.

Current Construction Reports include:

C20 - Housing Starts

C21 - New Residential Construction in Selected Standard Metropolitan Statistical Areas

C22 - Housing Completions

C25 - New One-Family Houses Sold and for Sale

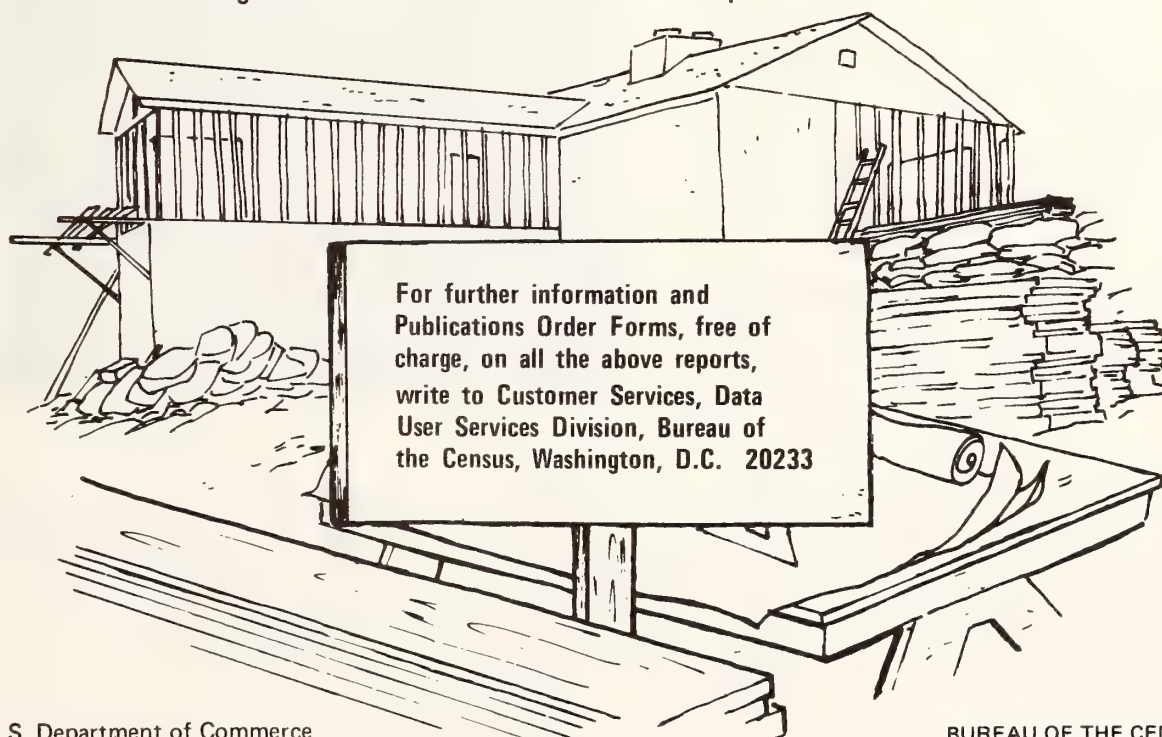

C27 - Price Index of New One-Family Houses Sold

C30 - Value of New Construction Put in Place

C40 - Housing Authorized by Building Permits and Public Contracts

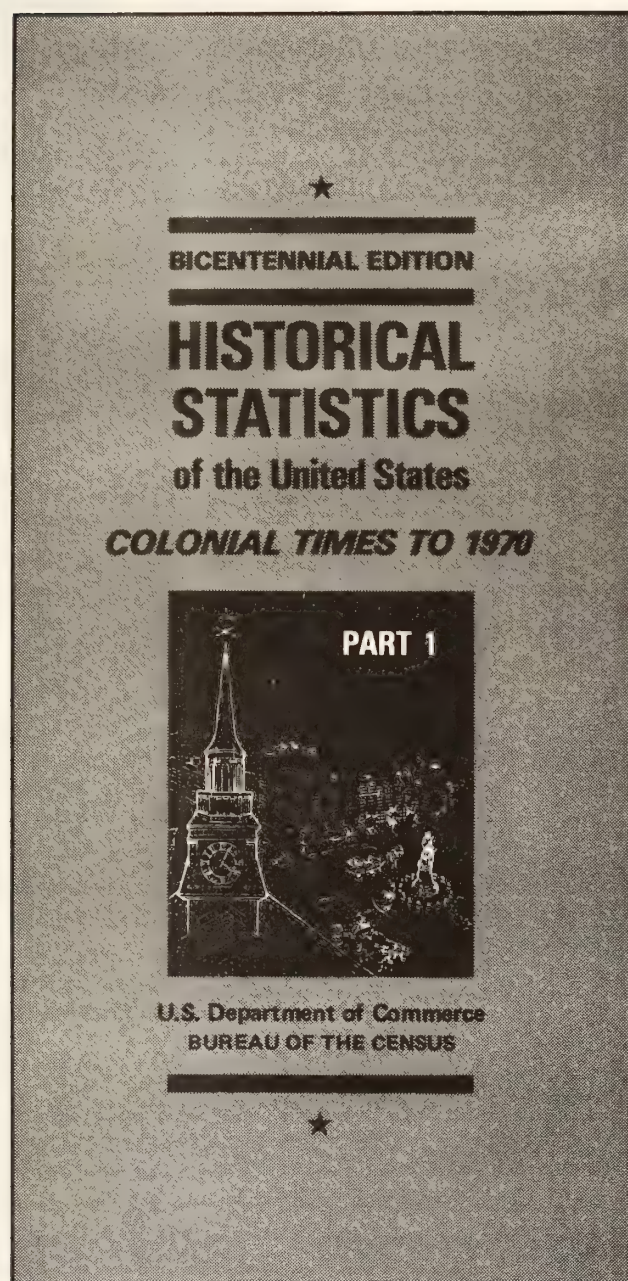

C45 - Permits Issued for Demolition of Residential Structures in Selected Cities

C50 - Expenditures on Residential Additions, Alterations, Maintenance and Repairs, and Replacements

For further information and Publications Order Forms, free of charge, on all the above reports, write to Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233

ANNOUNCING a Bicentennial edition of the basic reference book

DATA

More than 12,500 time series, mostly annual, on American social, economic, political, and geographic development covering periods from 1610 to 1970.

TEXT

References to other sources, description of development and reliability of the data, and definitions of terms.

SOURCE NOTES

Precise references to original sources for further study and additional information.

INDEXES

Time period index and detailed alphabetical subject index.

\$26.00 (cloth)

A total of 1,298 pages,
issued as Part 1 and Part 2.

Copies may be purchased from the Superintendent of Documents, Government Printing Office, Washington D.C. 20402, or from U.S. Department of Commerce District Offices or GPO Bookstores located in major cities.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

*Bureau of the Census
Library*

SEPTEMBER 1980

Issued November 1980

FT130-80-9

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription \$3.60.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

BUREAU OF THE CENSUS

Be Informed About Census Statistics... Subscribe to Data User News, the Census Bureau's Monthly Newsletter

Who's reading Data User News?

State and local government planners... librarians... market researchers... business professionals... information specialists... consultants... students... professors...

This monthly newsletter will keep you informed about—

- Census Bureau products and services
- censuses and surveys on the drawing board and estimates and projections in preparation
- highlights of statistics from other Federal agencies
- conferences and workshops

- new Census Bureau reports and guides
- State data centers and other organizations which offer statistical services

Data User News tackles the technical side, too, with—

- detailed information on new data files on tape
- indepth pieces on statistical series and methodologies

Stay informed about Census Bureau reports, products, and services which fit your needs. Subscribe to Data User News for \$ 14 per year.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

OCTOBER 1980

Issued December 1980

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittance from foreign countries must be by international money order or by draft on a U.S. bank. Price \$1.75 per copy. Annual subscription \$13.00.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

1978 edition Schedule B

Statistical Classification of Domestic and Foreign Commodities Exported from the United States

*the Bureau of the Census
offers*

The new edition of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Shown in this 1978 edition are current Schedule B commodity classification code numbers required on Shippers' Export Declarations.

The 1978 edition of Schedule B has been prepared through the efforts of the various government agencies involved and with the cooperation and assistance of industry, trade associations, exporters, and freight forwarders.

The structure of the new edition follows the format of the Tariff Schedules of the United States (the import schedule) and will result in changes to the codes used to identify commodities exported.

The new Schedule B publication is priced at \$13.00, including subsequent revisions. Copies may be ordered from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

NOVEMBER 1980

Issued January 1981

FT130-80-11

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Availability of Foreign Trade Microfiche Reports in U.S. Department of Commerce Field Offices

U.S. Department of Commerce BUREAU OF THE CENSUS

The following Foreign Trade reports are available for public reference in the form of microfiche at the U.S. Department of Commerce field offices:

IM 136 (IA 236 Annual) — (F.a.s. Import Value) — U.S. Imports for Consumption and General Imports. Continent by Country of Origin by TSUSA Schedule by TSUSA Number by Unit Control by Customs District of Entry and Unlading and Method of Transportation. Effective with the January 1979 monthly and 1978 annual report.

IM 145-X (IA 245-X Annual) — (Customs, f.a.s. and c.i.f. Import Values) — U.S. Imports for Consumption and General Imports. TSUSA Schedule by TSUSA Number by Unit Control by Country of Origin by Customs District by Rate Provision by Type by Economic Class for All Methods of Transportation Combined. Effective with the July 1976 monthly and 1978 annual reports.

IM 145-Y (IA 245-Y Annual) — (F.a.s. Import Value) — U.S. General Imports. TSUSA Schedule by TSUSA Number by Unit Control by Country of Origin by Customs District by Rate Provision by Type by Economic Class and Method of Transportation. Effective with the July 1976 monthly and 1978 annual reports.

IM 146 — (Customs Import Value) — U.S. Imports for Consumption. TSUSA Schedule by TSUSA Number by Unit Control by Country of Origin. Current Month and Cumulative — January to Date. Effective with the July 1976 monthly reports.

IM 150/155 — (F.a.s. Import Value) — U.S. General Imports — Tables 2, 3, and 4: Schedule A Subgroup by World Area by Method of Transportation; Schedule A Subgroup by Country of Origin by Method of Transportation; World Area by Schedule A Subgroup and Country of Origin by Schedule A Subgroup by Method of Transportation. Current month and Cumulative — January to Date. Effective with the January 1977 reports.

IM 154 (IA 254 Annual) — (F.a.s. Import Value) — U.S. Imports of Merchandise for Consumption and General Imports. Customs District by Country of Origin by TSUSA Number by Unit Control and Method of Transportation. Effective with the January 1979 monthly and 1978 annual report.

IA 253 Annual — (Customs Value) — U.S. Imports for Consumption and General Imports. Customs District of Entry by TSUSA Number by Unit Control by Country of Origin. Dutiable value and Calculated duty. Effective with the 1978 annual reports.

EM 450/455 — U.S. Exports of Domestic and Foreign Merchandise. Tables 2, 3, 4, and 7: Schedule E Subgroup by World Area by Method of Transportation; Schedule E Subgroup by Country of Destination by Method of Transportation; World Area by Schedule E Subgroup and Country of Destination by Schedule E Subgroup by Method of Transportation; Foreign Merchandise, Country of Destination Totals and Method of Transportation. Current Month and Cumulative — January to Date. Effective with the January 1977 reports.

EM 522 (EA 622 Annual) — U.S. Exports. Schedule B Schedule by Part by Subpart by Number by Country of Destination by Customs District of Exportation and Method of Transportation. Effective with the July 1976 monthly and 1978 annual reports.

EM 531 (EA 631 Annual) — U.S. Exports. Continent by Country of Destination by Schedule B Number by Customs District of Exportation and Method of Transportation. Effective with the January 1979 monthly and 1978 annual reports.

EM 546 — U.S. Exports. Schedule B Schedule by Schedule B Number by Country of Destination. Current Month and Cumulative — January to Date. Effective with the January 1978 reports.

EM 563 (EA 663 Annual) — U.S. Exports. Customs District of Exportation by Country of Destination by Schedule B Number and Method of Transportation. Effective with the January 1979 monthly and 1978 annual report.

EM 594 (EA 694 Annual) — Shipments of Merchandise from Puerto Rico to the United States and Shipments of Merchandise from the United States to Puerto Rico and the Virgin Islands. Schedule B Number by Country by Customs District and Method of Transportation. Effective with the

January 1979 monthly and 1978 annual report.

EM 596 (EA 696 Annual) — Shipments of Merchandise from Puerto Rico to the United States and Shipments of Merchandise from the United States to Puerto Rico and the Virgin Islands. Customs District by Country by Schedule B Number and Method of Transportation. Effective with the January 1979 monthly and 1978 annual report.

EA 664 Annual — Customs District of Exportation by Schedule B Number by Country of Destination and Method of Transportation. Effective with the 1978 annual reports.

SM 305/305 IT (SA 305/305 IT Annual) — U.S. Waterborne General Imports and Inbound Intransit Shipments. Type Service by Customs District and Port of Unlading by Foreign Port of Lading by Schedule A Subgroup by Country of Origin. Inbound Intransit Record Also Shows Country of Destination Detail. Effective with the July 1976 monthly and 1978 annual reports.

SM 705/705 IT (SA 705/705 IT Annual) — U.S. Waterborne Exports and Outbound Intransit Shipments. Type Service by Customs District and Port of Lading by Foreign Port of Unlading by Schedule E Subgroup by Country of Destination. Outbound Intransit Record Also Shows Country of Origin Detail. Effective with the July 1976 monthly and 1978 annual reports.

SM 705 Supplement (SA 705-Supplement, Annual) — Department of Defense Controlled Cargo Exported by Vessel Under the U.S. Foreign Aid Programs and Special Category Non-Department of Defense Controlled Cargo Exported by Vessel. Type Service by Customs District and Port of Lading by Country/Area of Unlading by Schedule E Subgroup by Country of Destination. Effective with the July 1976 monthly and 1978 annual reports.

Additional information regarding the availability of these reports and other foreign trade data may be obtained from the individual field offices or from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

DECEMBER 1980

Issued February 1981

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The U.S. import statistics reflect both government and non-government imports of merchandise from foreign countries into the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption and entries into customs bonded warehouses, and thus generally reflect total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued \$250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of

the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price \$1.75 per copy. Annual subscription \$13.00.

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of official acceptance by customs of the import entry form. This may not in all cases correspond to the actual month of importation. (For example, under the customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 5 to 6 percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry form) to a subsequent month, usually the succeeding month. In addition, as a result of the aforementioned customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a sub-

sequent month. These limitations should be borne in mind when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics.
Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)
